

## Advanced Auto – Test Systems For Automotive Electronics field

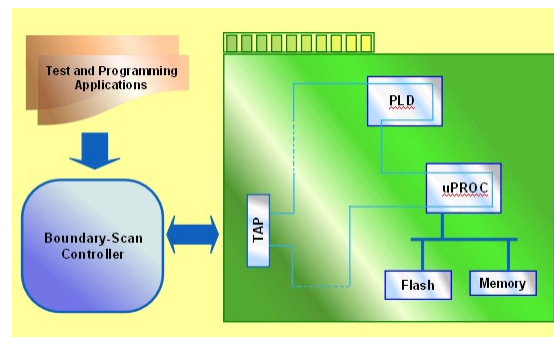

Automatic  
Integrated  
Programmable  
Graphical

**Eastern has a specialized automated test system for Automotive field.**

Eastern acquired a National Instrument production test equipment with Labview test Software, a very powerful graphical development environment test system equipment.

Features & Capabilities:

- Using the National Instruments (NI) test equipment with various test instruments (Oscilloscope, Spectrum Analyzer, Video Measurement, etc.) running under Labview test software.
- Boundary-Scan testing w/ Production Integrated Package (PIP) based on Labview software

- EOL or Run-in test which is similar to a reliability test.

simplifying **TEST SYSTEMS**

**Eastern Electronics Co., Ltd.**  
ISO 9001: 2000 TS16949

Engineering Manufacturing Services

- Enables a complete set diagnosis for automotive STB digital terrestrial receiver board:

**Complicated Wideband  
RF receiver board**  
(Frequency, Voltage,  
Current, etc.)

**Vehicle interior commu-  
nication board**  
such as FPGA, etc. to  
address car  
communication system  
(CAN, MOST)
